above its reference
index since launch

USD
100+ mio

of assets

*Let's embark on this
exciting investment
journey together,
aligning profits with
principles, for a more
sustainable and
equitable future.*

Green Blue Invest (GBI), the Cité Gestion's ESG brand, is partnering with one of the world's most recognised academics and experts on the topic of governance and stewardship.

These metrics identify companies that create value, display good governance, integrity and strive to generate a positive social impact from their business activities. Companies that have good stewardship scores typically outperform companies that have bad stewardship scores, which points to a market that increasingly recognizes 'stewardship alpha'.

From the universe of S&P 500 companies, the model rates companies based on their stewardship scores. By investing in well governed companies, Green Blue Invest aims to promote organisations that have a long-term vision, a social conscience, and that are better positioned to make a positive impact on the overall economy and society.
